Document ICD Between ECS and ASTER GDS

RID ID PDR 473

Review SDPS

Originator Ref IVV-KRM-08

Priority 2

Section 5.4

Page 5-2 - 5-12

Figure Table Table

Category Name Interfaces

Actionee HAIS

Sub Category

Subject Level of Detail

## Description of Problem or Suggestion:

The tables in section 5.4 are not sufficient to build or test the interface. Tables have been provided for some messages, however further detail is needed.

## Originator's Recommendation

Exact formats (down to the bit level), contents, order, method for encoding, and valid values need to be provided for all seven layers of the OSI model (e.g. application, presentation, network, etc.). If any of the layers are not applicable, then it should be stated as such, and if the details are documented in another document, then the document should be referenced.

HAIS Response Date 6/30/95

The author correctly observes that the tables in Section 5 do not contain sufficient detail to build or test the interface. As a Preliminary document this ICD is allowed to omit considerable detail unlike the Final ICD that will be published at CDR. The Final ICD will contain sufficient detail to build and test all interfaces.
